AND DISEASES**
with a vaccine?*

A photograph of a man and a woman sitting together in a modern, brightly lit setting. The man is sitting on the floor, wearing a light-colored cardigan over a white t-shirt and dark jeans. The woman is sitting on a chair behind him, wearing a blue top and white pants. They are both looking towards the camera with neutral expressions.

*An estimated
**3 IN 4 SEXUALLY ACTIVE CANADIANS
WILL HAVE AT LEAST ONE HPV INFECTION**
in their lifetime.*

GARDASIL[®]9 is a vaccine to help protect boys, men, girls and women 9 through 45 years of age against the following diseases: cervical, vulvar, vaginal and anal cancers caused by HPV types 16, 18, 31, 33, 45, 52 and 58 and genital warts caused by HPV types 6 and 11. GARDASIL[®]9 does not treat HPV infection and may not protect everyone who gets vaccinated. It will not protect against diseases that are not caused by HPV or due to HPV types not contained in the vaccine. Side effects and allergic reactions can occur. The most common side effects seen with GARDASIL[®]9 are pain, swelling, redness, itching, bruising, bleeding and a lump where you got the shot, headache, fever, nausea, dizziness, tiredness, diarrhea, abdominal pain, and sore throat. This is not a complete list of side effects. For any unexpected effects while taking GARDASIL[®]9, contact your doctor or pharmacist. Speak with your healthcare professional about the advantages and disadvantages of GARDASIL[®]9 to determine if it is suitable for you.
